

Web Programming Chapter 7

Exercise 1 (1/2)

- ◆ Create a form with two input fields: (slide 14)

Exercise 1 (2/2)

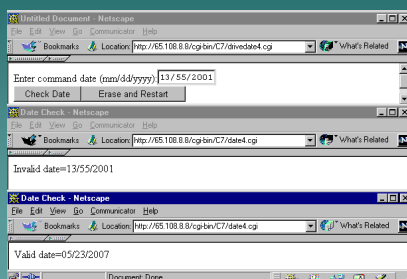

- ◆ Product code: must be started with "AB"
- ◆ Description shouldn't contain "boat" or "plane"

Exercise 2 (1/2)

- ◆ Use regular expressions to validate

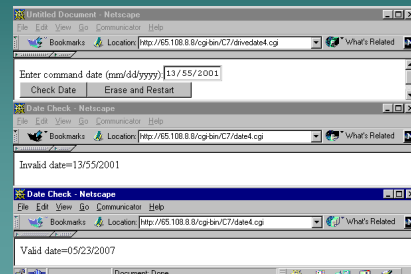

```
$two='[[:digit:]]{2}';  
$month='[0-3][[:digit:]]';  
$day='[0-3][[:digit:]]';  
$year="2[[:digit:]]$two";
```

Exercise 2 (1/2)

Exercise 3

- ◆ Improve exercise 2, use split() to further refine date validation

Exercise 4

- ◆ Create a register & then a login form
 - Store users' data, using MySQL server
 - ◆ Email (Check if email is valid)
 - ◆ Password
 - ◆ Mobile phone number (Check if phone number is valid)
